-----------------------	--

Easy Water Saving Tips Inside the Home:

- Wash only full loads of clothes and dishes
- Never leave water running while brushing your teeth
- Repair leaky fixtures such as faucets and toilets

Easy Water Saving Tips Outside the Home:

- Water plants and yard only when necessary
- Never water or use sprinklers during the heat of the day
- If feasible, wash the vehicle on your lawn, not in the driveway where the runoff will be lost to the sewer

On behalf of the Board of Directors of Fort Bend MUD #123, we are pleased to welcome you as a customer, and look forward to serving you. Please feel free to call our District operator, Municipal District Services, with any questions.

Fort Bend County MUD 123

SERVICE AGREEMENT

I. PURPOSE

The District is responsible for protecting the drinking water supply from contamination or pollution which could result from improper plumbing practices. The purpose of this service agreement is to notify each customer of the plumbing restrictions which are in place to provide this protection. The utility enforces these restrictions to ensure the public health and welfare. Each customer must sign this agreement before the District will begin service. In addition, when service to an existing connection has been suspended or terminated, the water system will not re-establish service unless it has a signed copy of this agreement.

II. PLUMBING RESTRICTIONS PER STATE REGULATION

- A. No direct connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air-gap or an appropriate back flow prevention assembly in accordance with Commission regulations.
- B. No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure principle backflow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention assembly tester.
- C. No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
- D. No pipe or pipe fitting which contains more than 8.0% lead exists in private water distribution facilities installed on or after July 1, 1988 and prior to January 4, 2014.
- E. Plumbing installed after January 4, 2014 bears the expected labeling indicating $\leq 0.25\%$ lead content. If not properly labeled, please provide written comment.
- F. No solder or flux which contains more than 0.2% lead exists in private water distribution facilities installed on or after July 1, 1988.

III. SERVICE AGREEMENT

The following are the terms of the service agreement between Fort Bend County MUD 123 (the District) and

_____, the "Customer."

- A. The Water System will maintain a copy of this agreement as long as the Customer and/or the premises is connected to the Water System.
- B. The Customer shall allow his property to be inspected for possible cross-connections and other undesirable plumbing practices. The Water System or its designated agent, prior shall conduct these inspections to initiating service and periodically thereafter. The inspections shall be conducted during the Water System's normal business hours.
- C. The Water System shall notify the Customer in writing of any cross-connection or other undesirable plumbing practice which has been identified during the initial inspection or the periodic re-inspection.
- D. The Customer shall immediately correct any undesirable plumbing practice on his premises.
- E. The Customer shall, at his expense, properly install, test and maintain any back-flow prevention device required by the Water System. Copies of all testing and maintenance records shall be provided to the Water System.

IV. ENFORCEMENT

If the Customer fails to comply with the terms of the Service Agreement, the District shall, at its option, either terminate service or properly install, test, and maintain an appropriate back flow prevention device at the service connection. Any expenses associated with the enforcement of this agreement shall be billed to the Customer.

VERY IMPORTANT INFORMATION ABOUT YOUR WATER SYSTEM DISINFECTION METHOD

FORT BEND MUD 123 uses chloramines as a disinfectant for your water. The use of chloramines rather than chlorine is not new technology as it is in widespread use in many cities and other drinking water supplies. The use of chloramines is intended to benefit our customers by reducing the levels of disinfection byproducts (DBPs) in the system, while providing protection from waterborne disease. The City of Houston has been treating its water with chloramines for over twenty years. Water containing chloramines is perfectly safe for drinking, bathing, cooking, and most other uses we have for water. **HOWEVER, there are two categories of people who need to take special care with chloraminated water:**

Kidney Dialysis Patients – The change to chloramines can cause problems to persons dependent on dialysis machines. A condition known as hemolytic anemia can occur if the disinfectant is not completely removed from the water that is used for the dialysate. Consequently, the pretreatment scheme used for the dialysis units must include some means, such as a charcoal filter, for removing the chloramines. Medical facilities should also determine if additional precautions are required for other medical equipment.

Live Fish or Other Aquatic Animal Owners – Chloraminated water may be toxic to fish. If you have a fish tank, please make sure that the chemicals or filters that you are using are designed for use in water that has been treated with chloramines. You may also need to change the type of filter that you use for the fish tank.

Following are questions and answers that may address questions that you may have.

What is chloramination?

Chloramination is the use of both ammonia and chlorine to disinfect water. Ammonia is added to water at a carefully controlled level. The chlorine and ammonia react chemically to produce combined chlorine residual or chloramines. Chloramines are safe in drinking water and serve as an effective method of disinfection. In the U.S., many water systems have used chloramination for several decades.

How can I get more information?

Feel free to contact the FORT BEND MUD 123 Operator, Municipal District Services at (281) 290-6500, should you have a question or comment.

Residents of Fort Bend MUD 122/123

BEST TRASH will be your new trash & recycle collection provider.
YOUR GARBAGE WILL BE COLLECTED AT THE **CURB** ON MONDAY AND THURSDAY.
YOUR **RECYCLE** WILL BE COLLECTED ON **THURSDAY** AT THE **CURB**

Please have trash and recyclables out to the curb by 7:00 a.m.

Best Trash will collect residential refuse located at the **curb** in resident provided bags or cans (**30-50 gallons**).

Best Trash will deliver **48 gallon recycle carts** at the beginning of October to each resident.

Trees, shrubs, brush trimmings and fencing must be bundled in lengths no greater than 4 feet with no branch diameter larger than 4 inches and bundles weighing more than 40 pounds. The bundling is required to allow quick pickup, and size limitations are required to avoid damaging the equipment in the compaction process. All residential waste materials except tree and yard waste must be either in containers, bags or bundles not exceeding 40 pounds.

Heavy/bulky items such as appliances, furniture, carpet (up to 1 room, rolled up four feet wide and less than fifty pounds) will be picked up either collection day. By Federal Law, refrigerators and freezers or any other items containing Freon must be drained of Freon and have an accompanying bill to validate such service was performed.

Items excluded from normal collection are dirt, rocks, bricks, concrete, tires, batteries, motor oil, cooking oil, waste generated by a private contractor or any materials or items deemed hazardous materials. Best Trash will leave a tag explaining the reason for non-collected item(s).

An enhanced feature of the new provider will allow for collection of items excluded by the contract if notified in advance, Best Trash will meet with a resident prior to collection day to determine a price to haul the non-contract items. If a resident does not notify Best Trash of such a special pick-up before its scheduled day, Best Trash will leave a notice for the resident to contact Best Trash during normal office hours before the next scheduled pick up day.

Please do not dispose of gasoline, motor oil, paints, cooking oil, or any other liquid items in a container that are not visible to Best Trash personnel. If not visible and results in spillage, that causes a stain, Best Trash is not responsible for the clean up.

Best Trash takes great pride in our recycling program and efforts. Ensuring the best recycle program for our customers takes time and effort on both sides. Please remove caps, liquids and food products from inside the containers. Please use the provided recycle bins for recyclable materials, NOT as an extra trash container.

Best Trash will collect **paper, plastics, aluminum and tin cans, and glass (all colors)** that are placed within the provided recycling bin. If items exceed container capacity, please place them adjacent to bin well marked as recyclable materials. If you find items left in your bin, it means they are not recyclable. Please dispose of these items in your trash container for the next scheduled pick up.

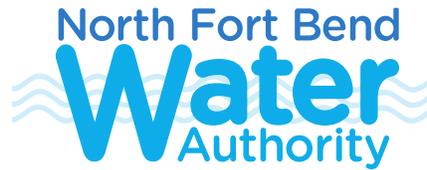

Best Trash will provide each current residence with one recycling cart. Best Trash will replace any cart that are defective or otherwise become unusable due to normal wear and tear. Lost or stolen carts can be purchased for \$65.00 each by calling Best Trash.

Holidays

When regular collection falls on a holiday: New Year's Day, Memorial Day, Labor Day July 4th/ Independence Day, Thanksgiving Day or Christmas Day, the next collection will be made on the next regularly scheduled collection day.

Best Trash, 17820 Madden Rd. Richmond, TX 77407

Ph: 281-313-(BEST) or 281-313-2378 www.best-trash.com

Dear New Resident,

Welcome to the neighborhood! Your new home is located within the boundaries of the North Fort Bend Water Authority (the "NFBWA"). Along with your municipal utility district ("MUD"), the NFBWA has been tasked with ensuring that you and your neighbors have a sustainable, long-term water supply.

The NFBWA encompasses approximately 141 square miles in Fort Bend County, and includes the City of Fulshear and more than eighty MUDs. The NFBWA, along with the Fort Bend Subsidence District, was created by the state of Texas to reduce subsidence in Fort Bend County and to deliver a long-term sustainable supply of water from sources other than groundwater (i.e. surface water) to the water users within the NFBWA boundaries. For more information on subsidence, please visit www.fortbendsubsidence.org.

When you receive your monthly water bill it will include a fee from the NFBWA. The NFBWA does not have the authority to levy a tax, so the NFBWA fees are used to construct and operate the necessary infrastructure to deliver surface water to areas within the NFBWA's boundaries.

Please review the attached brochure to learn more about the NFBWA and the NFBWA's water conservation programs. For more information about the NFBWA and the work we do, visit us at www.nfbwa.com.

Sincerely,

Board of Directors
North Fort Bend Water Authority

Enclosure

How Surface Water Gets To Your Home

- 1 NFBWA receives surface water from the City of Houston.
- 2 The water goes through an extensive purification process at the City of Houston treatment plant.
- 3 The water is piped 40 miles to NFBWA's Pump Station.
- 4 The water is then pumped to the municipal utility districts (MUDs) served by NFBWA.
- 5 The water is again tested, disinfected, and stored in ground storage tanks by the MUDs.
- 6 The water is then distributed through each MUD's distribution system to residents and customers.

Meter Station

This is where water from the City of Houston enters the Pump Station and is distributed through transmission lines to customers within NFBWA's boundaries.

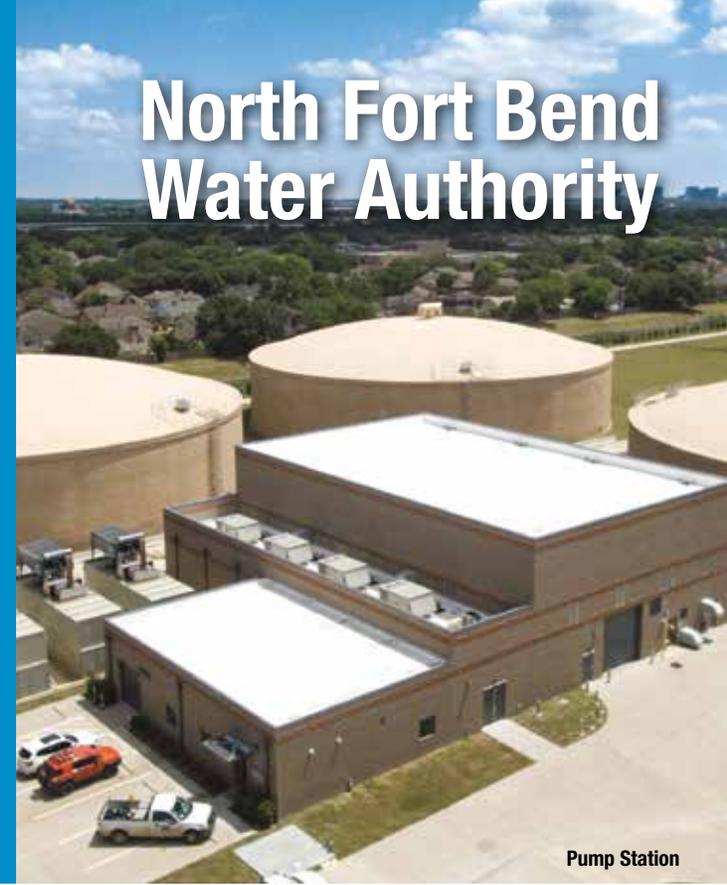

NFBWA Objectives:

- Provide compliance with FBSD's groundwater reduction mandate.
- Equally allocate costs among NFBWA's Groundwater Reduction Plan participants.

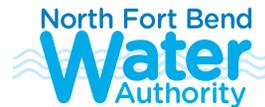

NFBWA Facts:

- Approximately 141 square miles are within its boundaries, located generally south of Interstate 10 and north of Highway 90A in Fort Bend County.
- Approximately 56% of NFBWA is in existing MUDs.
- Includes 80 special districts and the City of Fulshear.
- Approximately 165 total permitted wells are subject to the NFBWA's pumpage fee.

Piping for water plant pumps

About NFBWA:

The North Fort Bend Water Authority (NFBWA) was created in 2005. NFBWA is tasked with providing a long-term water supply to comply with the groundwater reduction requirements of the Fort Bend Subsidence District (FBSD).

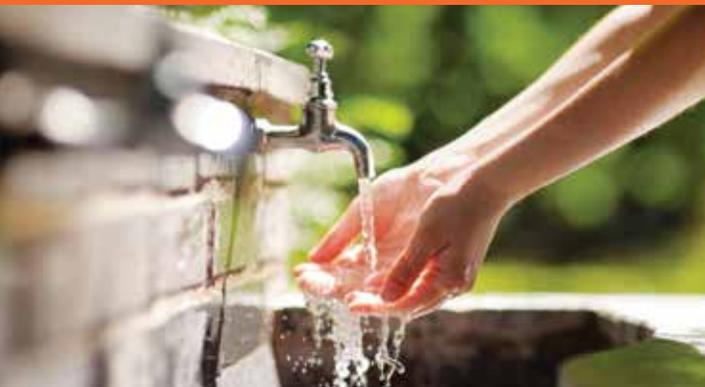

Under FBSD requirements, NFBWA is required to convert 30% of the water usage within its boundaries to an alternative water supply, such as

surface water, by 2014 (completed), and 60% by the year 2025.

Water Valve Vault

These vaults keep meters and valves clean, dry, and secure.

Current and Future Projects:

- **Luce Bayou Inter-basin Transfer Project**

This project will transfer additional raw water supplies from the Trinity River to Lake Houston.

- **Northeast Water Purification Plant (NEWPP)**

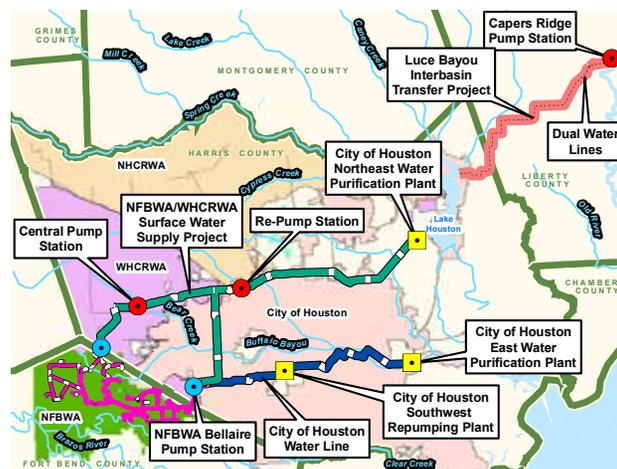

The City of Houston's NEWPP expansion will provide additional treated water to help meet water demands and conversion requirements for NFBWA and four other entities.

- **Surface Water Supply Project**

Surface water will be supplied from Lake Houston by way of the NEWPP through approximately 40 miles of 8-foot diameter pipeline and two large pump stations. The project extends north through Houston, west through Harris County, and south to NFBWA.

- **NFBWA 2025 Water Lines**

NFBWA will expand internal water lines to connect more water plants with surface water.

Water Conservation Programs:

- **Larry's Toolbox**

NFBWA offers an incentive-based program that gives participating municipal utility districts, homeowners' associations, and cities an opportunity to implement water conservation strategies to reduce consumption and waste. The program, called "Larry's Toolbox" and featuring NFBWA's mascot "Larry the Talking Sprinkler," offers a variety of water saving tools ranging from irrigation system evaluations to rain barrels to high water usage notifications.

For more information on Larry's Toolbox, please visit www.talkingsprinkler.com.

Larry the Talking Sprinkler

- **15% Saves \$400 Million**

An analysis by the NFBWA's engineers determined that if residents and businesses reduce their water usage by 15% before 2040, then \$400 million to build new surface water infrastructure could potentially be avoided.

Larry's Toolbox: 2022 Resident Water Conservation Rebate Form

Resident Name: _____

Email Address: _____

Installation Address: _____ Zip Code: _____

Mailing Address (if different): _____ Zip Code: _____

Resident Municipal Utility District: _____

Utility Acct. #: _____

Daytime Phone: _____

Date purchased: _____

Date installed: _____

Rebate amount is 50% of the item cost up to 3 items per year (excluding tax and shipping), not to exceed \$100.00 per item. Total rebate cannot exceed \$300.00.

Only EPA approved Water Sense and ENERGY STAR products are available through the program.

The purchased item(s) must have the Water Sense or ENERGY STAR logo.

Check item(s) installed below:

- Toilet
- Showerhead
- Faucet
- Aerator
- Clothes Washer

- Dish Washer
- Water Heater
- Weather-Board Irrigation Controller
- Rain Sensor Sprinkler
- Sprinkler Body/Nozzle

To receive the rebate, you must submit the following to the North Fort Bend Water Authority within 90 days of purchase:

- Rebates are available to your Municipal Utility District's ("MUD") single-family residential water customers with an account in good standing.
- Rebates are offered on a first come/first serve basis and are subject to availability of funds. The rebate may be terminated at any time, without notice, by your MUD. Please contact your MUD for details.
- Rebates are credited to utility account listed on the rebate form.
- Prior to issuance of a rebate, a representative from your MUD may conduct a site inspection to verify installation.

1. Rebate Form;
2. A dated and itemized receipt (or copy of receipt);
3. Photograph(s) of the product;
4. Photo of new item box, showing WaterSense or ENERGY STAR Logo;
5. and Copy of the plumbing repair receipt, if applicable.

Submission to the North Fort Bend Water Authority within 90 days of purchase.
