

June 28, 2022

Dear CNP Utility District Customer,

The City of Houston and the North Harris County Regional Water Authority (NHCRWA) have both implemented Stage 1 of their respective Drought Contingency Plans. As a customer of the NHCRWA, CNP Utility District is required to implement Stage 1 of its Drought Contingency Plan (DCP) immediately.

Voluntary Water Use Restrictions Applicable to Customers. Customers are requested to voluntarily limit the irrigation of landscaped and other areas between the hours of 8:00 p.m. and 6:00 a.m. on the following days:

- Customers with **even numbered addresses**: Thursdays and Saturdays
- Customers with **odd numbered addresses**: Wednesdays and Sundays
- Watering of common areas such as esplanades and sports fields: Mondays and Fridays

Additionally, customers are requested to practice water conservation and to minimize or discontinue non-essential water uses such as vehicle washing, power washing, gutter flushing, and refilling swimming pools, hot tubs or aesthetic fountains (except those that support aquatic life). Customers are also encouraged to take action to repair any known water leaks.

We appreciate your water conservation efforts and look forward to providing additional information in the near future.
